## 1080P 30x zoom camera & wireless monitoring camera for crane

MS-7HDW845

Have you ever been disturbed by following questions?

Accidents frequently seen in high altitude operations such as cranes/tower cranes?

Extra personnel needed for blind spot operation and oftenly hard to hear the instructions?

Limited visibility of the driver lowers the operation efficiency?

.....

## Features

- Optical 30x zoom mechanism, digital anti shake
- Flexible zooming, can control zoom-in/out and switch between manual/automatic zoom through a foot switch
- AI Pedestrian Detection
- 300M Transmission Distance
- 50M Night Distance; Equipped with 4 high-power infrared lights
- IP69K Waterproof
- Quick and Easy Pairing, Pairing is only needed for the first time, and both automatic and manual pairing are supported

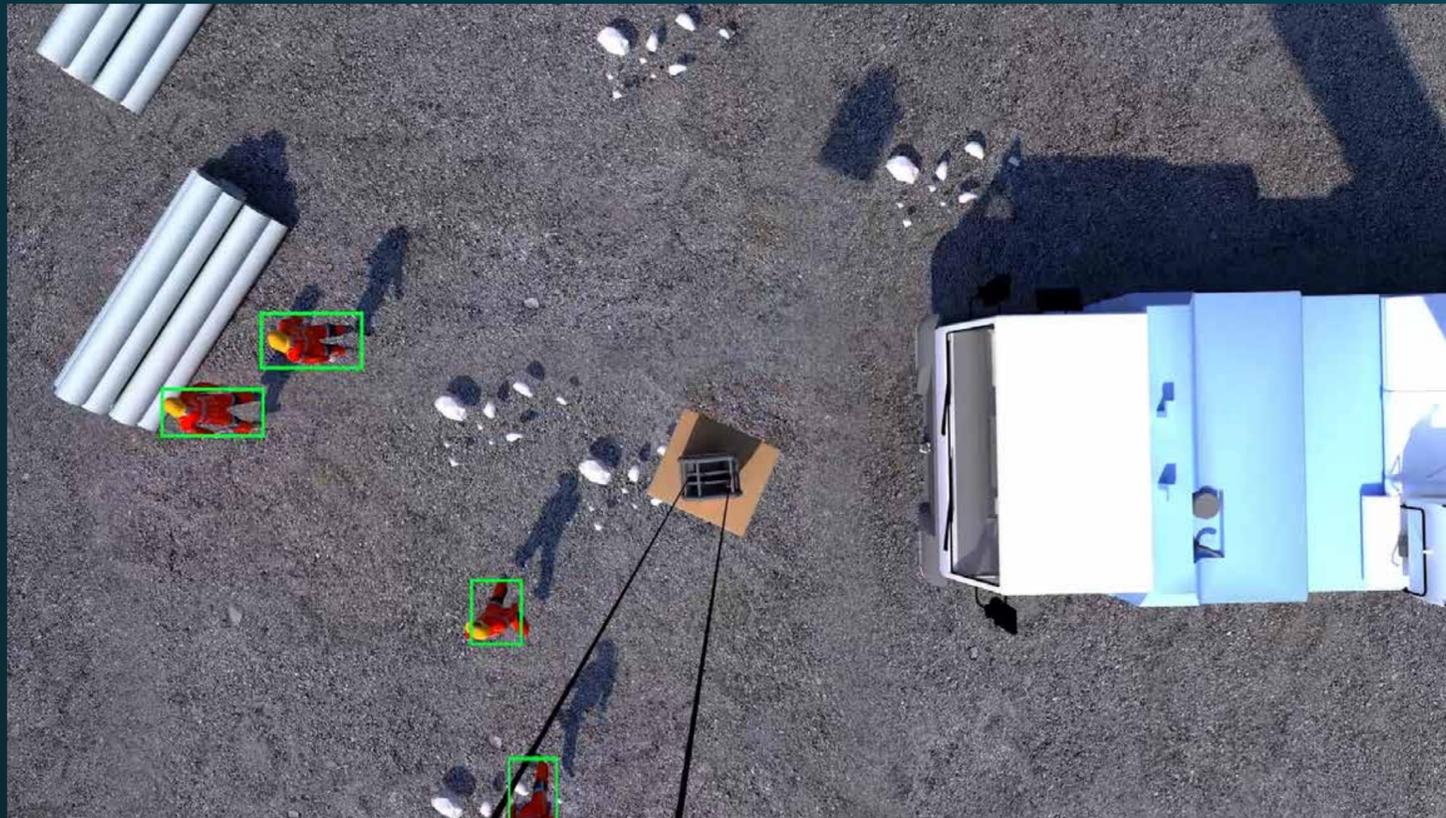

## Optical 30x zoom

MoviSight 1080P zoom & wireless crane camera is designed with optical 30x zoom movement, digital anti-shake, and is to be installed at the top of the crane/crane hook to look down below, in which way the operator can obtain an unobstructed view of the hook, thus the operation is made safer, faster and more accurate. Actually the camera makes it possible to respond to any urgent situations on the operation site, such as to avoid blind lifts when the goods are unbalanced or colliding. Such quick moves helps avoid any potential accidents.

## Built-in AI algorithm

Real-time detection of people around the lifting goods in crowded onstruction sites or busy ports reminds the operator of any collision risks.

## Flexible zooming method

Can control zoom-in/out & switch between manual/automatic zooming through a foot switch, improving camera working efficiency.

# MoviSight

Wireless transmission distance as far as 300 meters

Can transmit stable and clear real-time videos wirelessly and for a long distance, fit for various high-altitude operation scenarios.

**MoviSight**

4 high-power infrared lights, 50 meter high-definition night vision

Clear vision at night operation.

# MoviSight

IP69K waterproof, workable  
even in rain and snow

Work under all weather condition, very durable.

## Quick and easy pairing

Support auto pairing. After the first pairing, the camera and the monitor will only need to be powered separately to work together. Even after power disconnection, the minute when the power is reconnected, the signals can be transmitted automatically.

## Applications
